

SYSTEM AND METHOD FOR CONFIGURING A PRINTING SYSTEM

ABSTRACT OF THE DISCLOSURE

- 5 A system, method, and program embodied on a computer readable medium are provided for configuring the automated print agent for printing. In one embodiment, the method comprises receiving an email print message addressed to a network alias, the network alias being associated with an automated print agent employed for performing an email print, identifying a printer specified in the email
- 10 print message, determining if the automated print agent is configured for printing to the printer, and, automatically configuring the automated print agent to print to the printer upon a determination that the automated print agent is not configured to print to the printer.
